

Alcona Ash Firewood Network

Got dead ash? Need firewood to heat? The Alcona Conservation District is working to connect landowners with dead ash with those who heat with firewood. Salvaging ash on small acreages of land is vitally important to allow them to be reforested effectively.

Please help us help you and ensure the health and future of our forests.

If you own standing dead ash or are looking to find firewood, please contact District Forester Andrew Beebe @ (989) 335-1056 or visit alconaconservation.org
